About Me

Motivated Computer Science student with solid skills in programming, software development, and problem-solving. Eager to apply technical knowledge and fresh ideas to real-world projects. Passionate about learning new technologies, growing in a dynamic team, and contributing to impactful solutions. Committed to quality, efficiency, and continuous improvement while building a successful career in tech.

Academic Projects

Room Allotment System

- Developed a Room Allotment System using C# and .NET Framework as part of a fourth-semester academic project.
- Implemented functionalities for room assignment, availability hecks, and student data management.
- Utilized Windows Forms for UI design and integrated SQL server Management Studio for database operations.
- Focused on clean code structure, logical data flow, and a user-friendly interface for real-world usage simulation.

Car Parking Counter System

- Developed a Car Parking Counter System using Arduino UNO as a part of a 5th-semester DLD project.
- Implemented sensor-based vehicle detection and real-time car count display logic.
- Coded system logic to handle entry/exit tracking and update the counter accurately.
- Focused on practical application of digital logic design and microcontroller programming.

Work Experience as Graphic Designer

- Work as a graphic designer making Social Media Post for different Companies.
- Work as packaging Design at local Base for different clients of Multan.
- Work as graphic designer making social Media posts related to Fast food for cheezy Slice.
- Work as Social Media Manager for Cheezy Slice.
